III. ALMR COMMUNICATIONS SERVICES

Services provided are listed in the Operations Management Office and System Management Office Customer Support Plans at <http://www.alaskalandmobileradio.org>.

IV. GENERAL PROVISIONS

- A.** ALMR Mobile Radio Coverage: ALMR provides portable and mobile radio communication coverage to the member subject to the member's responsibilities and compliance with recommended optimal performance standards for equipment, antenna installation, and maintenance. If the member agency detects possible ALMR network infrastructure malfunctions or radio communication coverage loss, the member should first contact the ALMR Help Desk and provide specific information regarding the problem, as requested. If the system is cleared as a probable cause, the agency should then contact its equipment service or maintenance provider for an evaluation of the problem. If the service provider determines the problem is not an equipment installation or maintenance problem, the member should promptly notify the Help Desk. The Help Desk will immediately notify the System Manager, or designated on-call technician, who will promptly investigate and take appropriate corrective action to alleviate the coverage loss or network infrastructure malfunction and report the corrective action to the member agency. Coverage is not guaranteed and will vary from location to location. The member

Alaska Land Mobile Radio Communications System Membership Agreement

agency is encouraged to conduct its own radio communications coverage test to determine the expected coverage level in its geographic jurisdiction.

- B.** Private Calling Availability: an agency may choose to avail itself of Private Calling. Private calling permits properly programmed mobile and portable radios in a talkgroup to enter into one-on-one conversations. Only the initiating and target radio(s) are able to communicate with each other. Private calling can tie-up ALMR system resources. Consequently, a determination of the need and potential impact on the system will be made by the System Management Office when such a request is received from Member agencies.
- C.** Electronic and Infrastructure Maintenance: ALMR provides complete monitoring, inspection, and maintenance programs for all Motorola P25 trunked ALMR radio frequency (RF) infrastructure in operation at its system sites through contracts and in accordance with the Service Level Agreement.
- D.** System Redundancy and Security: ALMR has system redundancy . With system redundancy, a single point of failure will generally not result in negative system-wide performance. Many redundant and backup systems within ALMR are designed to eliminate complete system failure. Several levels of survivability are available.
- E.** Performance Standards and Monitoring: ALMR utilizes performance standards and diagnostic methods, which are monitored 24 hours a day. System management is maintained at the System Management Office and zone controllers on a daily basis. ALMR staff adhere to stringent quality standards of installation and maintenance through scheduled inspections of all sites, monitoring of member satisfaction on a regular basis, tracking of member problems and service requests, monitoring of scheduled and unscheduled system downtime, oversight of system traffic performance, drive testing within the system, collection and analysis of empirical data, and planned system upgrades and enhancements.
- F.** Upgrades and Enhancements: upgrades are changes made to ALMR infrastructure to assure compliance or to improve upon previously existing features and operations of ALMR. Some upgrades may be provided to all member agencies at no additional charge. Enhancements are modifications made to ALMR services or systems that add functions or features not originally part of ALMR or the services requested by the member agencies. Such enhancements made to the infrastructure may also require an upgrade or replacement of user subscriber assets. To access such enhancements and features, it is solely the responsibility of the user to upgrade their subscriber assets. Also, if applicable, enhancements may necessitate an adjustment in all member agencies' fees.
- G.** Gateway Use: gateways are options for members to use if they have a gateway device and obtain the required approval to use it on the system.
- H.** Information Assurance: as provided through the Department of Defense Information Assurance Risk Management Framework (DIARMF).
- I.** OMO Standards Measurement and Trends: as provided by the Operations Management Office Customer Support Plan (CSP) and the Service Level Agreement (SLA).
- J.** Service Level Agreement: outlines the operations and maintenance services as required by the User Council for the sustainment and operations of the ALMR infrastructure. The performance metrics contained in the SLA describe the maintenance standards for the ALMR system infrastructure. ALMR cost share services are also outlined in the SLA.
- K.** State-owned frequencies: Subsequent to provisions of Federal Communications Commission (FCC) Regulation 47CFR90.421(b), the State of Alaska grants specific and limited permission as a part of ALMR membership to utilize the frequencies listed below under the terms and conditions of the State's FCC license(s). These frequencies are specifically set aside for public safety interoperability and used as part of the designated required interop zones for membership. Members shall immediately cease using any or all frequencies upon the request of the state, all channels will be named per state instructions.
- L.** Interoperability Zone Conventional Channels: State1, State2 and NSAR (National Search and Rescue, also called VSAR16 in the DHS NIFOG) are licensed to the State of Alaska, specifically the APSCS frequency manager. ALMR membership has authorization to use those three channels statewide for their intended purpose by the State. FCC call signs can be provided by

contacting the APSCS office. VCall 10, VTAC 11-14, and 36 are authorized nationwide by the FCC for local interoperability use; rules are in the DHS NIFOG. Channels 8-16 in the three ALMR interop zones are the State of Alaska standard VHF interop channels as outlined in the TICP part of the SCIP.
