To Whom It May Concern,

At their 4/12/17 Kachemak City Council Meeting, the council decided to write a letter of non-objection regarding Gregoire Construction's participation in a pilot composting program, effective for one year. If Gregoire Construction wishes to continue the program after one year, the Council will evaluate the request, taking into account whether neighboring landowners have expressed concerns about the project. Potential concerns would include wildlife/ bear attractants, odor, late night noise-level, and any seepage of compost material onto nearby properties.

Sincerely,

Erica Fitzpatrick
