The Seward Bear Creek Flood Service Area (Service Area) has identified the need for removal of sediment within Spruce Creek upstream of the bridge. This proposed project would consist of removing the mid channel bar adjacent to the rip rap revetment and side casting material to the left bank.

The Lowell Point Community Council (LPCC) has contributed \$5,000 toward this project. In addition, the Service Area has voted to match the LPCC contribution of \$5,000 for this project
