☒ **New Application** ☐ **Transfer of Ownership Application** ☐ **Renewal Application**
☐ **Onsite Consumption Endorsement**

We have received a completed application for the above listed license (see attached application documents) within your jurisdiction. This is the notice required under 3 AAC 306.025(d)(2).

This application is scheduled for the December 6-7 Marijuana Control Board Meeting.

A local government may protest the approval of an application(s) pursuant to 3 AAC 306.060 by furnishing the director **and** the applicant with a clear and concise written statement of reasons for the protest within 60 days of the date of this notice. If a protest is filed, the board will deny the application unless the board finds that the protest is arbitrary, capricious, and unreasonable. To protest the application referenced above, please submit your protest within 60 days and show proof of service upon the applicant.

3 AAC 306.010, 3 AAC 306.080, and 3 AAC 306.250 provide that the board will deny an application for a new license if the board finds that the license is prohibited under AS 17.38 as a result of an ordinance or election conducted under AS 17.38 and 3 AAC 306.200.

3 AAC 306.010(c) provides that the board will not issue a license when a local government protests an application on the grounds that the applicant's proposed licensed premises are located in a place within the local government where a local zoning ordinance prohibits the marijuana establishment, unless the local government has approved a variance from the local ordinance.

At this time, the fingerprints submitted by the applicant cannot be submitted for a criminal history report until a date to be determined by the Department of Public Safety and the Federal Bureau of Investigation based upon the effective date of the act containing enabling statutory language for such criminal history report. On April 27, 2016, the Marijuana Control Board directed me to determine applications complete based solely upon the representations made by the applicant in Form MJ-00.

Sincerely,

Section 2 – Security

Review the requirements under 3 AAC 306.710 – 3 AAC 306.720 and 3 AAC 306.755, and identify how the proposed premises will meet the listed requirements.

Describe how the proposed premises will comply with each of the following:

Restricted Access Areas (3 AAC 306.710):

Describe how you will prevent unescorted members of the public from entering restricted access areas:

Bob's Morning Bear Cultivation (the Applicant) has implemented a Visitors Policy to restrict access to all parts of the licensed premises where marijuana or marijuana product is cultivated, stored, or stocked. The Visitors Policy details the security requirements to prevent unescorted individuals from entering restricted access areas. Such requirements include locking facility doors at all times to prevent general public access; requiring the Licensee, employees and agents of the marijuana establishment are required to wear a current identification badge bearing the person's photograph; requiring all visitors to call ahead and arrange access to the cultivation facility; and at all times visitors must be escorted by an employee.

Upon arrival, an employee escort who will request identification from the visitor, complete the visitor's log, and issue a visitor's badge shall greet visitors. Valid forms of identification include an unexpired, unaltered passport; a driver's license or permit; or an identification card of any U.S. state or province or territory of Canada. Security Alarm Systems and Lock Standards (3 AAC 306.715):

Exterior lighting is required to facilitate surveillance. Describe how the exterior lighting will meet this requirement:

The facility has adequate exterior lighting to best support the security surveillance equipment. Motion-activated lights are located on each of the elevations of the facility building around the entire parameter. The motion sensor lights trigger when motion is detected within 100 ft. of the building. Cameras also activate when the motion/light is detected. The exterior lighting enhances the ability to clearly determine images on the video recording.

An alarm system is required for all license types. Describe the security alarm system for the proposed premises:

The facility has security alarm system sensors on all exterior doors and windows, exterior lighting, and continuous video monitoring. The Applicant has established policies that indicate how the alarm is de-activated each morning and activated each evening as the employees depart. The policy defines which employee has the responsibility for setting the alarm and disarming the alarm. Each authorized employee has a unique alarm access code. The policy also defines the procedure to follow in the event of an alarm, or a false alarm. If an alarm is triggered, the alarm system shall send a signal to the owner of the facility, and the manager-on-call. The facility owner or manager shall be responsible for calling the police in case of an emergency situation or breach of the facility. All false alarms shall be recorded in a false alarm log that shall collect data that may help avoid future false alarms.

The alarm system must be activated on all exterior doors and windows when the licensed premises is closed for business. Describe how the security alarm system meets this requirement:

The alarm system installed has contact point sensors on all exterior doors and windows. When the licensed premise is closed for business, the alarm system shall be activated. The alarm shall be triggered by any disturbance of the doors or windows. The triggering of the alarm system shall send a signal to the owner and the manager-on-call. It shall be up to the discretion of the owner to establish if the alarm has been triggered because of an attempted breach or accidentally. If the alarm has been triggered due to an attempted breach, authorities shall be notified. If the alarm has been triggered accidentally (i.e. act of nature: a branch went through a window during a storm.) The alarm shall be recorded on a false alarm form.

Alaska Marijuana Control Board

Form MJ-01: Marijuana Establishment Operating Plan

Describe your policies and procedures for preventing diversion of marijuana or marijuana product:

The Applicant has policies in place regarding facility visitors, surveillance and alarm systems to prevent the diversion of marijuana or marijuana product. The Applicant has a strict hiring policy whereby all employees shall submit to background checks. All employees shall be trained to recognize potential diversion risks, and learn how to report errors and mistakes in inventory so it does not appear to be diversion of product. In addition to employee training, signs posted around the facility warn of the consequences of diversion of marijuana. Only specific employees shall be assigned administrative responsibilities in METRC, the inventory control system. The inventory tracking system is capable of sharing information with the systems the Alcohol and Marijuana Control Office (AMCO) implements to ensure that all marijuana cultivated and sold in the state, and each marijuana product processed and sold in the state is identified and tracked from the time the marijuana is propagated from seed or cutting, through transfer to another licensed marijuana establishment, or use in manufacturing a marijuana product to a completed sale of marijuana or marijuana product or disposal of the harvest batch of marijuana or production lot of marijuana product. All marijuana and marijuana products shall be weighed on a certified scale. Additionally, weekly inventory audits will be performed and discrepancies will be investigated and resolved.

Describe your policies and procedures for preventing loitering:

The Applicant does not anticipate much loitering due to the location of the facility off a dead-end road in a sparsely populated area. Regardless, the Applicant has established a policy to prevent loitering that includes posting NO LOITERING and NO TRESPASSING signs around the exterior fence of the facility. If individuals are found loitering, they shall be asked to leave. If the individual refuses to leave, law enforcement may be called as a last resort. Signs posted on the premises indicate that the facility is under 24-hour video surveillance. Cameras shall be reviewed regularly to ensure the loitering policy is effective.

Describe your policies and procedures regarding the use of any additional security device, such as a motion detector, pressure switch, and duress, panic, or hold-up alarm to enhance security of the proposed premises:

The Applicant has additional security devices including motion detectors and panic buttons. Motion detectors shall be connected with lights and alarms on the outside of the facility. Motion detectors installed in the facility shall trigger when the alarm is set and motion is detected. All alarm systems shall be set to send an audible alarm to the facility owner and manager on-call. The facility owner shall establish if the alarm is false or real. If the alarm is legitimate law enforcement shall be contacted. In the case of a false alarm, systems shall be reset and the false alarm shall be recorded in a false alarm log. Alarms and surveillance equipment shall be tested bi-weekly. All records related to security and alarms shall be backed up on hard drives and cloud based storage.

If the breach is a real alarm, the facility manager shall alert a local law enforcement agency of the unauthorized breach of entry.
