Borough Clerk's Office
Kenai Peninsula Borough

16 December 2016

Dear K.P.B. Assembly,

Ordinance No. 2016-43 claims our property has benefitted from the gas line that was installed on the easement destroying dozens of beautiful trees.

We will only benefit if we hook up to the gas. We should only be forced to pay at that time.

This gas company is a for profit company. Why am I paying for their installation? It just increases their profits and does not benefit me.

With a slump in property values, having a gas line on our property does nothing to increase the value of our home.

This is yet another example ^{showing} where your loyalties lie, with the gas & oil industry and not with the little people (property owners).

Show some spunk and tell the gas company that the installation is just part of doing business and should

only be assessed to those that
hook up.

This extra assessment is an
unfair taking by the gas company
and you're approving it.

Shame on you if you bend to the
big buck gas & oil companies again.

Sincerely,

Claudia Pedersen
