Subject: Dr. Quenneville

Bob,

Dr. Quenneville has asked if we would set up a remote wireless reading workstation at his apartment to allow him to remotely read and dictate imaging studies. The reading workstation with 3 Mega Pixel monitors will cost \$11,633. The CPSI workstation \$2,000 and the wireless connection \$6,000.

We recently purchased a FY15 capital item, a PACS software upgrade, at a significantly lower amount than what had been originally budgeted. The upgrade cost us \$13,500 and the amount budgeted was \$39,500. Would it be possible to ask that the remaining funds be reallocated?

Thank you,
Donna
