How long have you lived in the area served by this Advisory Planning Commission?	What knowledge, experience, or expertise will you bring to this board?
6 years (since 06/2017)	Having been born and raised in Alaska, I have an appreciation for its communities, cultures, traditions and unique environment. In my professional career, I worked for several years in the safety and environmental field and I also sold real estate for a period of time. These work activities required travel around the state (and country) where I was able to gain an understanding of economic activities and its importance to thriving communities. My interest in community planning stems from these experiences. I am knowledgeable about housing and public facilities and the infrastructure which is required for their success (including roads, water and waste water treatment systems, platting, utilities). My background would allow me to contribute to the continued safety and success of our community,
