

Dear Borough Clerk, I am writing to you about the proposed Special Assessment Improvements in Diamond View Estates. I am a property owner at 41047 Kay Ct. Please bring this to the attention of the meeting on May 5th as I am out of state and cannot attend.

I do not need nor want the proposed improvements. If Enstar wishes to extend their services to get more customers at their cost, I have no problem with them doing it. I do not want myself or my neighbors to be assessed for this improvement. Enstar should do it out of their capital improvements budget and charge for the provided service as customers apply for service. What we really need potable water made available for the neighborhood. The well water has a terrible smell and taste.

Thank you,

Ronald Willmann

Assembly members,

My wife and I are completely in favor of the proposed USAO. We use propane and the cost is extravagant.

I feel as though I have been mugged each time the suburban truck makes a delivery. It seems that no matter the price of oil the cost for propane only goes up.

Please approve the formation of this district.

I am visiting family outside and will not make the meeting but want to ensure my desires are known.

Roy J. Wilson
