Subject: Raising taxes

To: Jblankenship@kpb.gov

I would strongly urge your body not to implement the raising of taxes on personal items we purchase. Believe the 500\$ limit is all you need to collect. Every time we turn around you try to raise taxes on something live within your means. If that means reducing man power or services so be it. I do not think you should reduce the senior exemption you say you don't get any comments will here was mine!
