Message:

This legislation is consistent with the progressive agenda to divide certain sectors of the public, either the 4300 seniors taking advantage of the property tax exemption against the general population of 60K residents or within that same 12-14 percent against each other.

If this is passed forward to the ballot, it is simply a progressive effort to ask the population to increase to fighting within the population. An abhorrent effort reminiscent of the current federal administration. Please review Saul Aulinisky writings for clarification. Thank you for VOTING NO on this legislation.

Subject: Senior Exemption 2016-24

Hi, I would like to let you know we are against taking the senior exemption away from Seniors. We have been speaking with others like our self and believe taking that Senior exemption away and the PFD in jeopardy along with bringing in State taxes and possibly more on sales tax is to much. The medical community will suffer losing many seniors as they can no longer afford to be here. Please reconsider for the good of the community. Kenneth and Kathryn Longfellow
