Dear Mayor Pierce

Subject: Enstar Gas LINE

This letter is in regards to the five hundred feet of two inch dia. plastic gas line piping that parallels our property.

Many of the property owners bordering the Kasilof river along with some of the more "deep-pockets" parcel owners at the beginning of Sandwich Ave and beyond are in favor of the gas for heating and household appliances, apparently.

Two of their "spokespersons" somewhat convinced us to entertain the concept of how much more economical natural gas is than oil, wood or propane and changing our appliances from electric to gas.

So we devoted considerable time to do the math on this concept and to our life style circumstances. We also <sup>were</sup> led to believe "... if the majority of parcel owner were in favor of the gas line that the minority would still <sup>have</sup> to pay, proportionately, for the cost of material and labor of its installation.

We did the math and with all the expenses of changing from our present heat sources to natural gas along with our Appliance.

Infrastructure would be dollars-to-save-dimes"

Therefore, after much deliberation we informed ENSTAR we did not want the resident line to the house from the main line at the road. (which was across the road)

The meter purchase along with the monthly service charges, heating and appliance engineering would be a severe financial burden, especially when we are quite content the way things are

If or when we sell our parcels and the new owners of our resident or unimproved lot want natural gas let them deal with ENSTAR.

Sincerely, *Paul Voo*  
*Mujun Voo*

P.S. We are not requesting any special favors..... our proposal should apply to all parcel owners who are in the minority

Subject: Notice of Proposed

Utility Special Assessment Notice

Mailed May 17, 2017

Dear Mayor Navaire:

After giving the certified letter

we received some serious thought, we

are adamantly opposed to the project

as it is formulated. We are the owners

of two lots one with is our residence and

one that is unimproved. It appears should

this project go ahead it will cost us

over \$10,500 for a product we don't

wish to have. We can purchase a lot of

prepane and/or stove at far that

amount. The entire project does not

make economic sense in where

absolutely oppose to buying into some -

thing we don't want or need.

Sincerely,

Paul & Myrna Ito
