Submitted At: 4:01 pm 05-04-26

I support Resolution 2026-025 and appreciate that it provides the local funding requested by KPBSD for FY2027.

I have submitted a fuller written comment to the Assembly Clerk and through the Borough's public comment form, but I want to briefly add that I view this funding as a necessary stabilization measure for current students, working families, and communities across the Kenai Peninsula.

I understand the concerns about long-term sustainability and agree that the Borough should not be expected to solve the State's education funding problem indefinitely. However, withholding support from the system currently serving our students, without a clear and accessible alternative, does not fix the problem. It simply leaves today's students with fewer resources and fewer opportunities.

I urge the Assembly to support this resolution and to continue working toward a long-term education funding solution that allows families to stay, work, build businesses, and raise children on the Kenai Peninsula.
