

A photograph of the Upper Kasilof River. The river is in the foreground, with a group of people standing on the rocky bank in the middle ground. The background is filled with dense green trees. A white text box is in the top right corner.

Ordinance 2015-14

Swanson Property on Kasilof River
(distributed by Assembly Member Wolf)

Upper Kasilof River

A typical weekend of Public use
on Private Property. **This is not a park, this is Private Property.**

Our family purchased this property to make sure no development took place. Ordinance 2013-18, section 12 (subsection B), item #3 requires private property owners to get a permit to post permanent private property signs to protect the riverbank from what you see above.

What is the real problem for the habitat,
the private property owners or the general public's belief
that they have a "right"
to the riverbank?
