Please forward to all KPB assembly members. Maybe we can get legislation like this in alaska.

Keep looking up!!!!

Andy

Hi James,

Let no one say we aren't doing anything about election integrity.

OK, this is a long update, but bear with me- it's worth it.

This is Wendy Rogers, the Chairman of the Senate Elections Committee of the Arizona Senate. [We're making the progress on elections that others only talk about, with YOUR help!](#)

First, some good news: we have passed a key resolution to get around the objection of the semi-legitimate Katie Hobbs!

Western Journal has the story:

The Arizona Senate Committee on Elections passed a resolution Monday reclaiming its authority to oversee federal elections in the state.

The resolution — offered by Senate Majority Leader Sonny Borrelli, a Republican — also requires voting machines to be made entirely of components made in the U.S.

Further, the source code of any machines used in federal elections must be made available to the public along with the ballot images and system log files of each tabulator used during an election.

Maricopa County, where 60 percent of Arizona's voters live, uses Dominion Voting Systems, while nearly all the other counties in the state use Election Systems & Software. Both Dominion and ES&S voting equipment include components from Dell, which sources many of its microchips from China and Taiwan.

ES&S acknowledges on its website that some of its components come from China, but all its machines are assembled and tested in the U.S.

In a Tuesday interview with "Real America's Voice" host Steve Bannon, Senate Elections Committee Chairwoman Wendy Rogers said, "We passed a Senate concurrent resolution through the committee, which reclaims our plenary power per the United States Constitution to oversee federal elections."

"The Senate [concurrent] resolution is something that the governor has no say in," she explained.

"We also passed through committee a Senate bill, which will ostensibly reclaim our power to oversee state elections," Rogers said.

This was one thing we could do that DIDN'T need Katie Hobbs' signature- it's reasserting the authority the Constitution gave us all along.

We did however pass normal legislation also- including a fix for the current elections mess.

Wendy Rogers ✓

@WendyRogersAZ

SB 1695 is the comprehensive defining bill of our session to restore election integrity. It gives post-election SPECIFIC & EXPEDITED REDRESS to voters who've been DISENFRANCHISED due to a botched election. #SenJakeHoffman @AZSenatorShamp @Wadsack4Arizona

Meanwhile, the Gateway Pundit reports that Dominion Machines- used only in Maricopa County, within Arizona- are "riddled with bugs", per court documents:

On Thursday, FOX News filed a brief in this case with Dominion Voting Systems. FOX News uncovered some material issues with Dominion and its voting systems. These items were so serious that Dominion employees expressed concerns about these issues.

Discovery in this case revealed that Dominion's own employees expressed serious concerns about the security of its machines.

Mark Beckstrand, a Dominion Sales Manager, confirmed that other parties "have gotten ahold of [Dominion's] equipment illicitly" in the past. Beckstrand identified specific instances in Georgia and North Carolina and testified that a Dominion machine was "hacked" in Michigan. Beckstrand confirmed that these security failures were "reported about in the news."

And just weeks before the 2020 presidential election, Dominion's Director of Product Strategy and Security, Eric Coomer, acknowledged in private that "our shit is just riddled with bugs." Indeed, Coomer had been castigating Dominion's failures for years. In 2019, Coomer noted that "our products suck." He lamented that "[a]lmost all" of Dominion's technological failings were "due to our complete f— up in installation."

*In another instance, he identified a "***critical*** bug leading to INCORRECT results." Ex.H4, Coomer Email (Jan. 5, 2018). He went on to note: "It does not get much worse than that." And while many companies might have resolved their errors, Coomer lamented that "we don't address our weaknesses effectively!"*

Sounds to me like Dominion employees know their product has fatal errors!

Discovery in this case has revealed that Dominion's own employees expressed serious concerns about the security of its machines. Mark Beckstrand, a Dominion Sales Manager, confirmed that other parties "have gotten ahold of [Dominion's] equipment illicitly" in the past. Ex.E3, Beckstrand Dep. Tr. 127:8-127:22. Beckstrand identified specific instances in Georgia and North Carolina and testified that a Dominion machine was "hacked" in Michigan. *Id.* Beckstrand confirmed that these security failures were "reported about in the news." *Id.* And just weeks before the 2020 presidential election, Dominion's Director of Product Strategy and Security, Eric Coomer, acknowledged in private that "our shit is just riddled with bugs." Ex.H2, Coomer Email (Oct. 30, 2020). Indeed, Coomer had been castigating Dominion's failures for years. In 2019, Coomer noted that "our products suck." Ex.H3, Coomer Message (Nov. 5, 2019). He lamented that "[a]lmost all" of Dominion's technological failings were "due to our complete f--- up in installation." *Id.* And in another instance, he identified a "*critical* bug leading to INCORRECT results." Ex.H4, Coomer Email (Jan. 5, 2018). He went on to note: "It does not get much worse than that." *Id.* And while many companies might have resolved their errors, Coomer lamented that "we don't address our weaknesses effectively!" Ex.H5, Coomer Email (Sept. 25, 2019).

I've been called many names by the Democrats and their media allies. But when it's all said and done, the facts all point to one conclusion:

Our elections aren't secure and are susceptible to fraudulent interference.

We long suspected it. Now we have proof.

[We are doing everything we can to make proper changes and fix the issues. But the media won't report it fairly! Will you help me tell the people of Arizona about what we found?](#)

The system is flawed. But we can fix it! [Help me push the election law changes we need to see- and then spread them to other states!](#)

America First,

Wendy Rogers

Dear Kenai Peninsula Borough Assembly Member,

AZ IS ATTACKING DOMINION

Arizona moves to permanently end the systemic voting fraud that has been plaguing their state since the fraudulent 2020 election. Arizona has acted within its Senate to permanently ban Dominion Voting Systems from rigging anymore of its elections,

Arizona had banned Dominion Voting Systems and I am requesting that the KPB also ban election components not made in the U.S. and that all machine source code ballot images and tabulator system log files be available to the public. If you ignore this request to remove these Dominion Voting Systems you will eventually be removed from office for future Dominion Voting Systems failures. Now is the time to cancel all KPB Dominion Voting Systems contracts.

Let no one say we aren't doing anything about election integrity.

OK, this is a long update, but bear with me- it's worth it.

The Dominion Voting Systems story that should terrify Kelli Ward

Opinion: As Dominion Voting Systems continues to go after media outlets and others who promoted baseless claims that it fixed the election, there is one person in Arizona who should be very afraid.
