Until a thorough justification of need is presented to the community there must not be any consideration of this subject. At a minimum all aspects of finances must be presented. Including income, expenses and current debt. What affect will this have on the ISO rating? Will it affect the need and authority of the oversight committee? How does it affect the independent unilateral authority of the fire chief? Will it change areas of responsibility, ie, FD focusing on fire fighting in CL and on highway support for the ambulance? Will this change existing articles of incorporation and by laws? Sent from my iPhone
