To Whom it May Concern:

I am in the 300 foot Parcel Radius. I am deeply concerned about this application for a license for a limited Marijuana Cultivation Facility.

I am not happy with the smell of Marijuana that will be coming in my direction. I am directly south of him, and the wind blows a lot from the North. When he ramps up more than he is now.

I have lived on this property all my life and hate to think the awful smell is going to ruin my enjoyment of walking in my yard. I am also concerned about the value of my property being devalued by this. It is in my plans to sell in the next couple years. Who wants to live next to this.

His next door neighbor already has a problem with him and the odor, and his lack of respect for his neighbors.

Please reconsider issuing him a license to do this.

Thank-you - Mary Bryan
