Support

I support enacting the ordinance, and encourage the Assembly to do so. My support is premised on the belief and knowledge that most public employees are good, conscientious people fully aware they're job is customer service. At every level they understand the financial and performance obligations to taxpayers. These laws exist to assure gross mismanagement, waste of funds, clear abuse of power and other issues can be reported on behalf of the community, without fear of reprisal. Too bad it's necessary, but employees and others need a clear understanding that doing the right thing will not be arbitrarily punished. I'm happy to see the Assembly acting on it in support of transparency and ethics. Respectfully, Scott Walden
