

Ordinance 2019-25

# PROTECT OUR FUTURE

Dear Kenai Peninsula Borough Assembly,

**July 2019 was Alaska's – and the planet's – hottest month ever.** The entire Kenai Peninsula was affected by **massive wildfires** and **droughts**, the City of Seldovia and Village of Nanwalek have declared **water emergencies**, and **record-breaking temperatures** logged in Kenai Peninsula and Cook Inlet streams are **threatening the future of wild salmon runs**.

Considering the extreme climate changes on the Kenai Peninsula and the significant threats they present, I firmly urge the Borough to join communities around the world in creating a **CLIMATE ACTION PLAN** that includes:

## ADAPTATION

Regional adaptations to changes, as well as a framework to 1) track environmental changes, 2) their impacts, and 3) the effectiveness of our adaptations.

## RENEWABLE ENERGY STRATEGY

A renewable energy strategy with a target of 40% greenhouse gas reduction by 2030, in line with commitments by Anchorage and cities and boroughs around the world.

## REDUCE FOOTPRINT

Analysis of regional energy inefficiencies and planned improvements. Strategies to improve recycling infrastructure and composting.

I urge the Assembly to pass a 2019 KPB Comprehensive Plan that includes these measures.

Sincerely,
