I don't want a mandatory vaccine

I am writing to oppose the timing of Resolution 2020-078. As winter rapidly approaches and the pandemic worsens in our area, I believe that they are more pressing matters that should be the focus of our assembly meetings. Based on the divisive topic of this resolution, it is bound to bring lengthy public testimony that will detract from the assembly's time and energy to focus on more important issues that our community is currently facing; for example, access to a cold-weather shelter. My concern is that this resolution further divides our community at a time when a vaccine is not only unavailable but not close to being ready to distribute. I would be happy to have the public weigh-in on this topic, and the assembly to make a decision about this resolution, at a more appropriate time in the future. For now, I ask that this resolution be tabled at tonight's meeting, or withdrawn by the sponsors and brought back when we are closer to actually experiencing the realities of the situation presented in the resolution. Thank you.

I am opposed to all government mandates that would require us to wear a mask or anything that would impede our breathing, and thus our health; I am also opposed to any mandate requiring the citizens of the USofA to be inoculated with anything, including a Covid-19 vaccine. I am opposed to any government interference to my health. Period.

We the people will NOT consent to any unconstitutional mandate to be vaccinated, or comply with a national face mask requirement. We also support Mayor Pierce, Assembly Members Jesse Bjorkman and Bill Elam with their Resolution 2020-078. The time has come that liberty loving citizens take a stand against tyranny. If not us, then who?

I support this mandate of opposing all government mandates that requires the public to be inoculated with a vaccine with a 99.98% survival rate!

Its America!!!! You have no right to make it mandatory to be vaccinated. This should be definitely a choice not a right. Quit ignoring the constitution and over ruling the people.

I support the mayor's resolution. I see no reason for a mandatory vaccine when the CDC's report has stated that the survival rate, after being infected, is 99.98%. That alone is enough reason to even stop these emergency declarations. Vaccines rushed through without any long term safety trials don't inspire much confidence in the public. If someone wants to take the vaccine they are more than welcome, but it should not, for any reason, be mandated.
