☐ Have not been complied with.

2. The Appellant was provided the opportunity to offer testimony of witnesses and evidence during the hearing.

4. The Appellant presented sufficient evidence to shift the burden of proof:

☐ No

5. Additional findings specific to evidence presented in this appeal:

- The Appellant initially shifted the burden by bringing forth comparable sales and an appraisal;
- The Assessing Department addressed and rebutted all of the points made by Appellant except for the concrete floor in the basement;
- Upon learning of the error in the basement flooring, the Assessing Department amended its appraisal to reflect the concrete flooring, bringing it in line with the comparables and appraisal;
- The subject property is currently valued uniformly and equitably with the surrounding parcels and other similarly unique parcels;
- Influences were applied correctly and uniformly to the subject property;
- The Assessing Department used standardized mass appraisal procedures and techniques to specify and calibrate market models which were applied uniformly to value properties within the Borough. The modeled values were statistically tested to ensure a level of accuracy and equity of assessment that met the guidelines established by the Alaska Association of Assessing Officers and the International Association of Assessing Officers and is in compliance with Alaska statutes.
- The Assessing Department reviewed the physical characteristics of the subject property to ensure that all data was accurately captured.

- b. ☐ The valuation by the Assessor is in error, and the Appellant has met its burden of proof and submitted sufficient evidence to prove that the correct assessment is a total value of \$\_\_\_\_\_.
